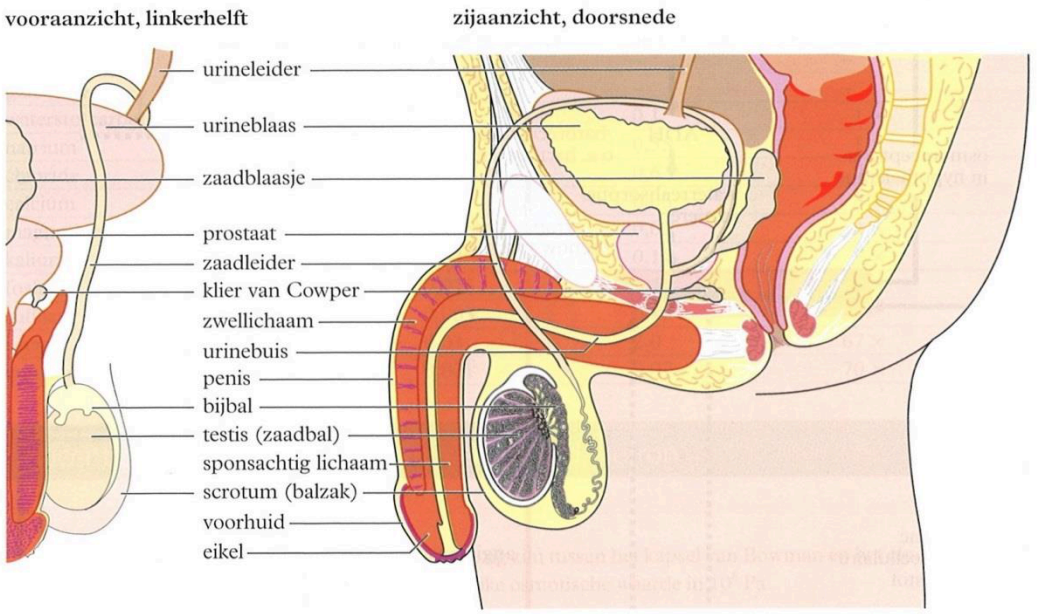
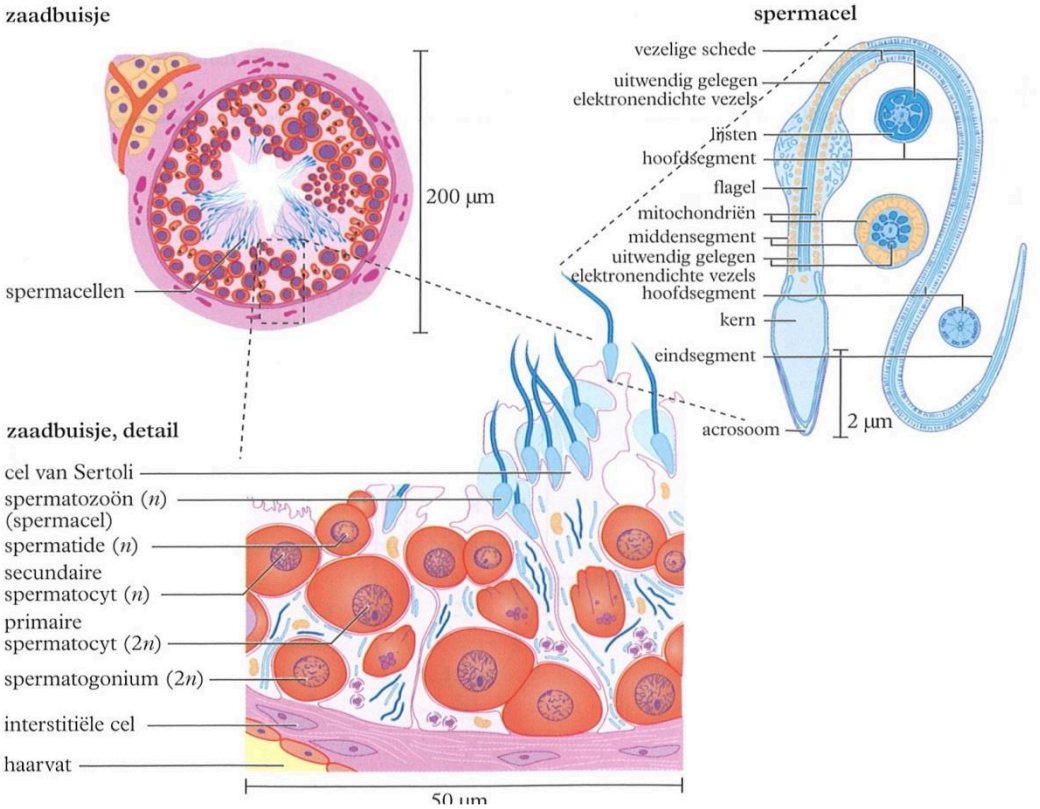
A Geslachtsorganen man

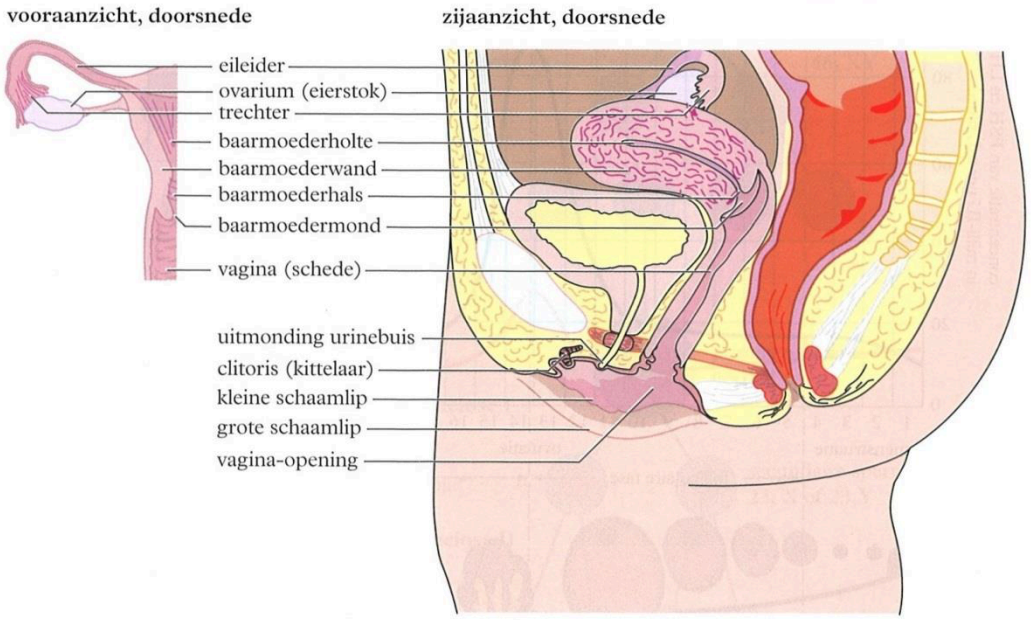
1 Ligging in het lichaam



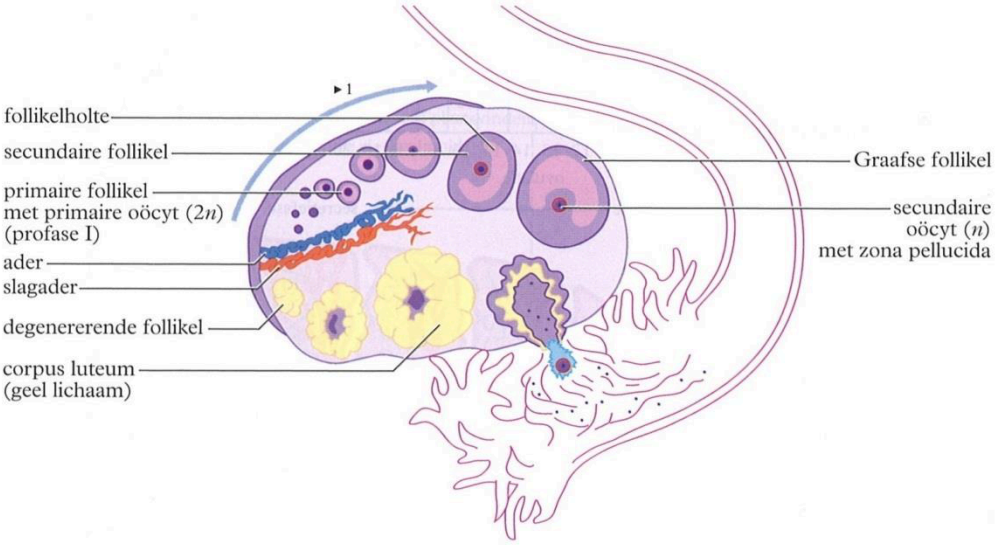
2 Zaadbuisje, spermacel



Ligging in het lichaam 1

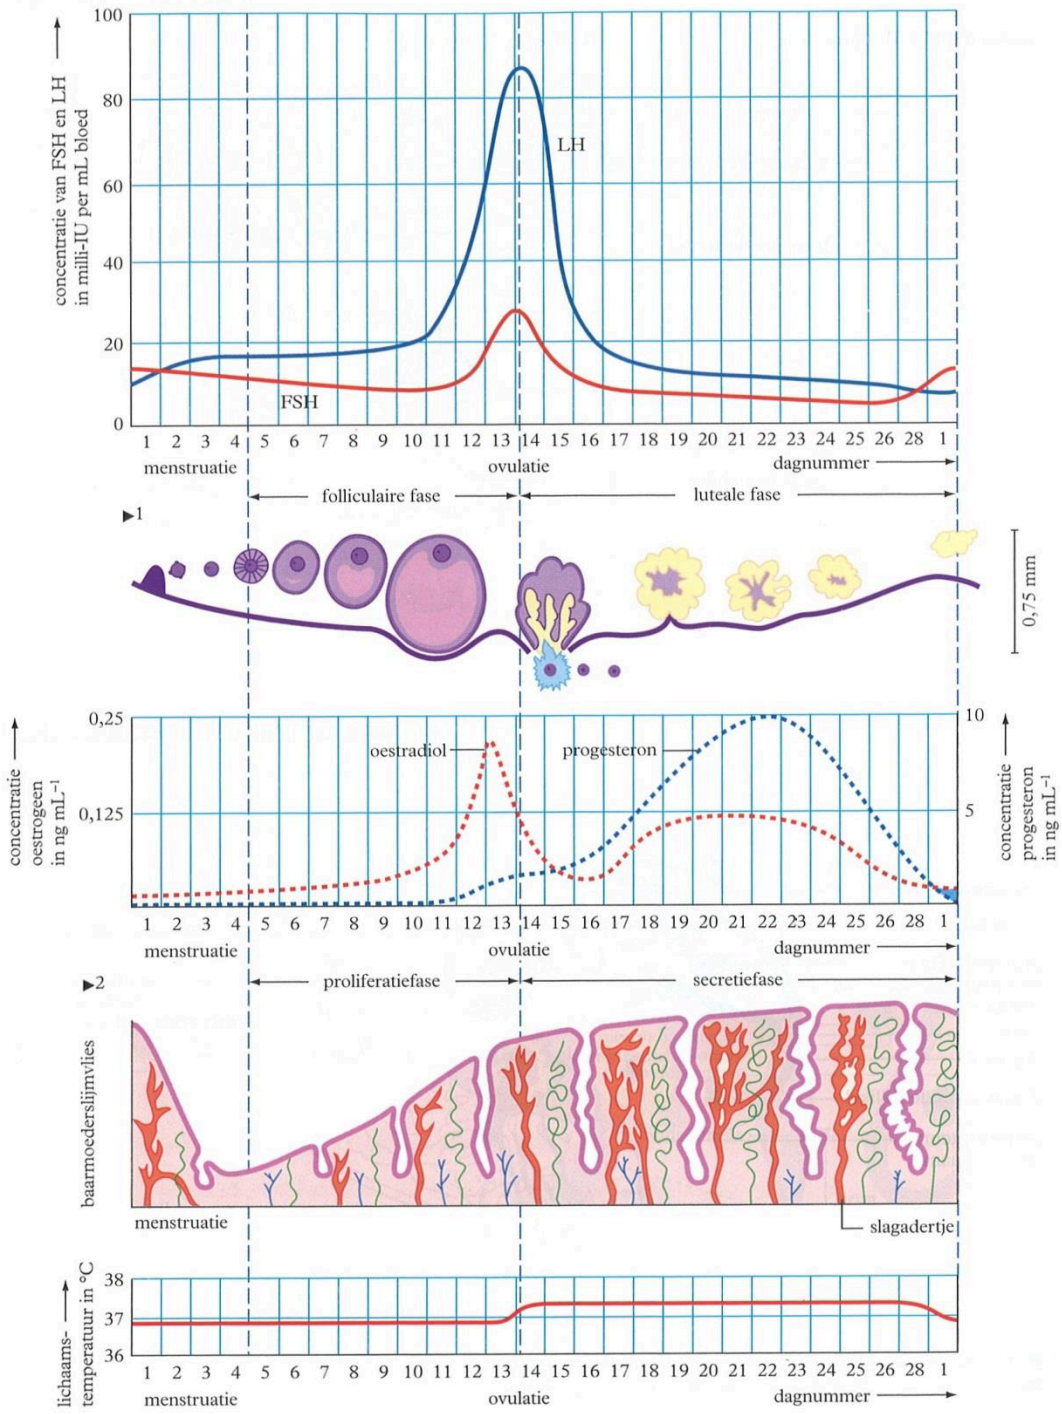


Ovarium: ontwikkelingsstadia follikel 2



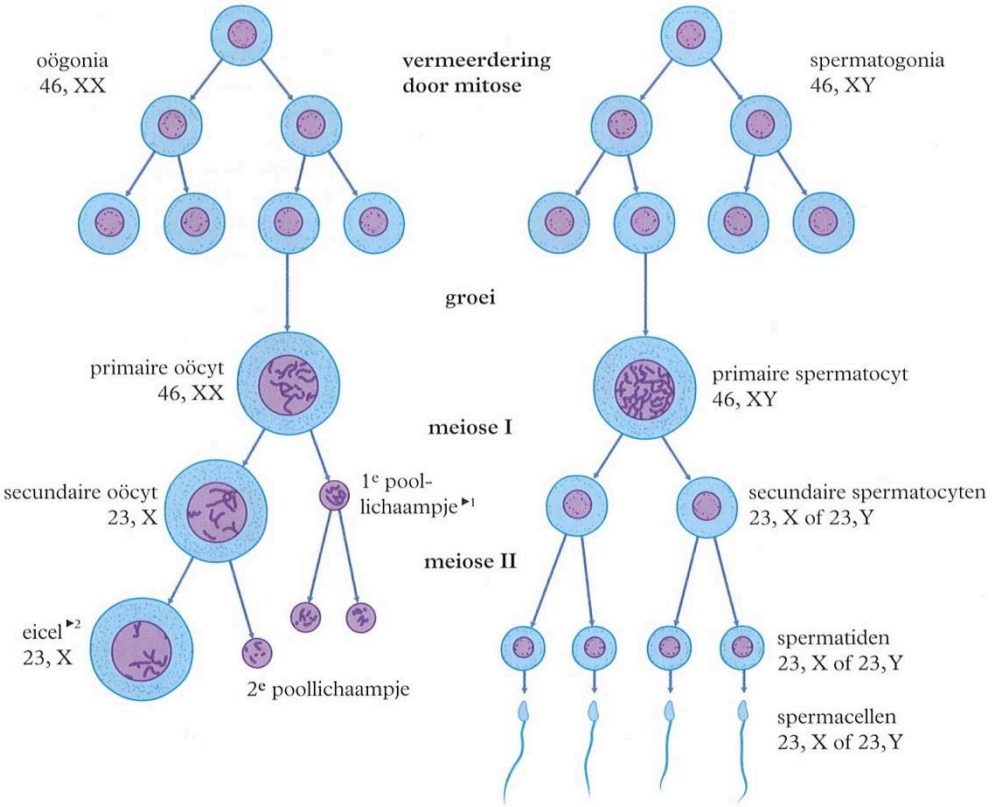
■ De verschillende onderdelen zijn niet op dezelfde schaal getekend.
■ De verschillende stadia komen in werkelijkheid niet alle tegelijk voor.

1 ► ⟶ richting van ontwikkeling.



■ Zwangerschap: zie tabel 86E.

1 ▶ ontwikkeling follikel c.q. geel lichaam
2 ▶ ontwikkeling baarmoederslijmvlies met bloedvaten

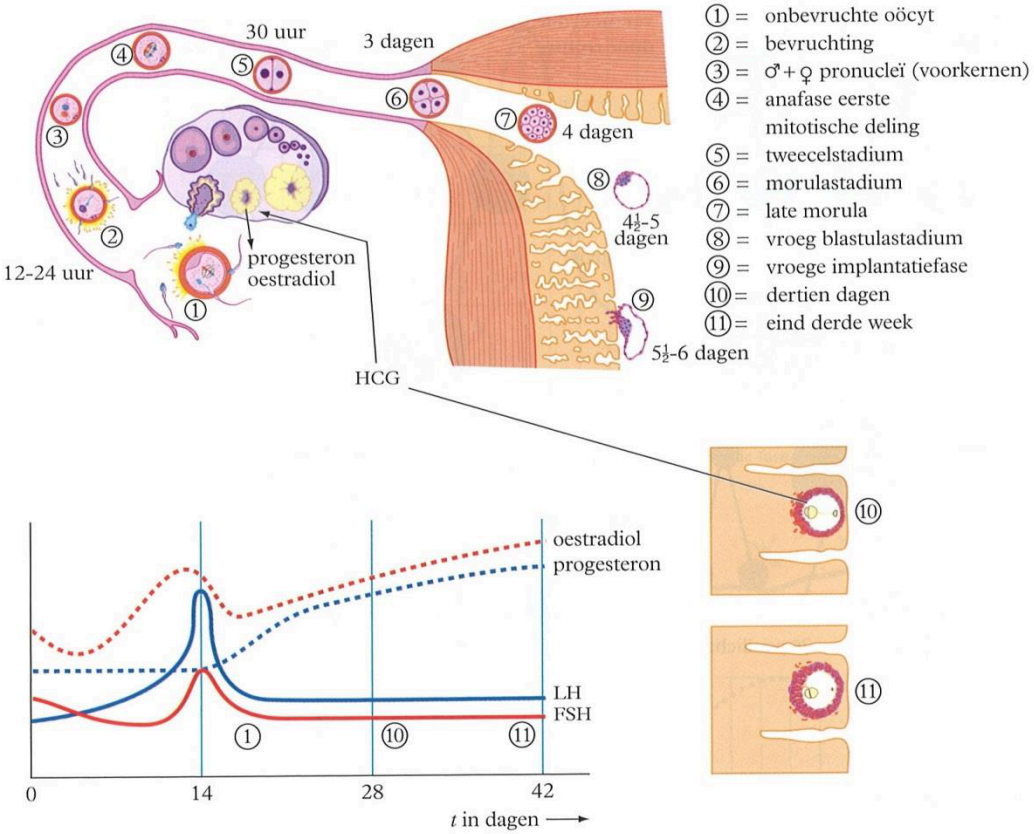


■ Mitose en meiose: zie tabel 76B.

1 ▶ Bij het 1e poollichaampje kan wel of niet meiose II plaatsvinden.

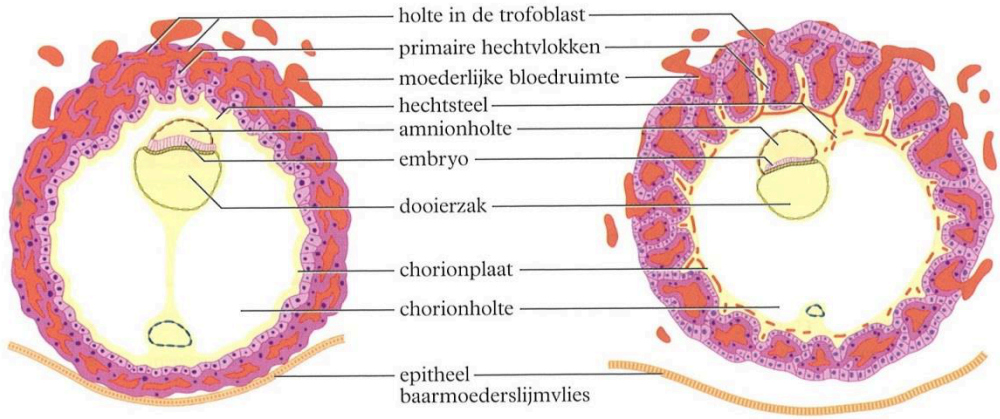
2 ▶ Na bevruchting wordt de meiose II in de eicel voltooid.

eerste weken



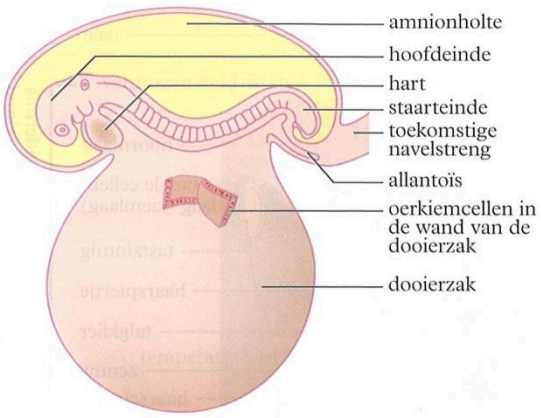
■ FSH/LH resp. oestrogeen/progesteron in onderlinge verhouding.

dertien dagen **einde derde week**

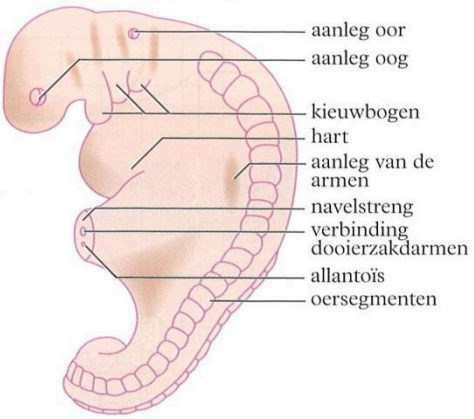


vervolg

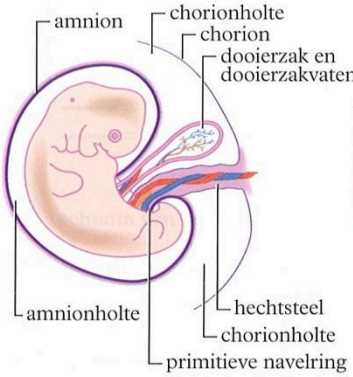
drie weken, alleen embryo met dooierzak



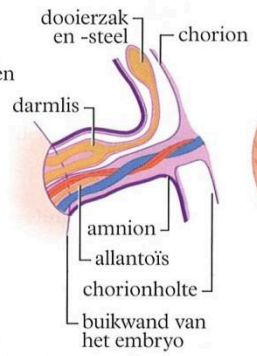
27 dagen, alleen embryo



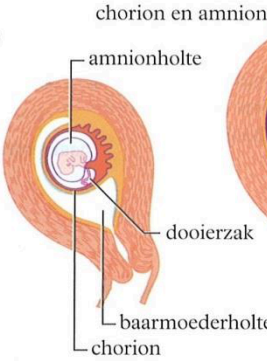
vijf weken, embryo



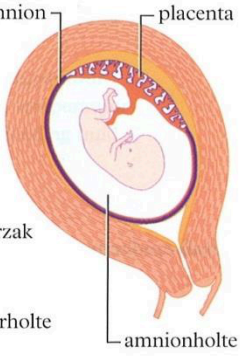
tien weken, navelstreng



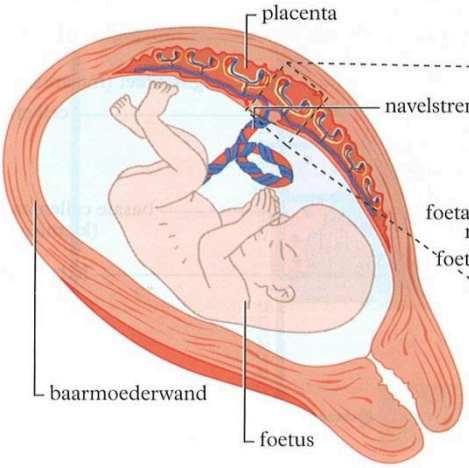
eind tweede maand



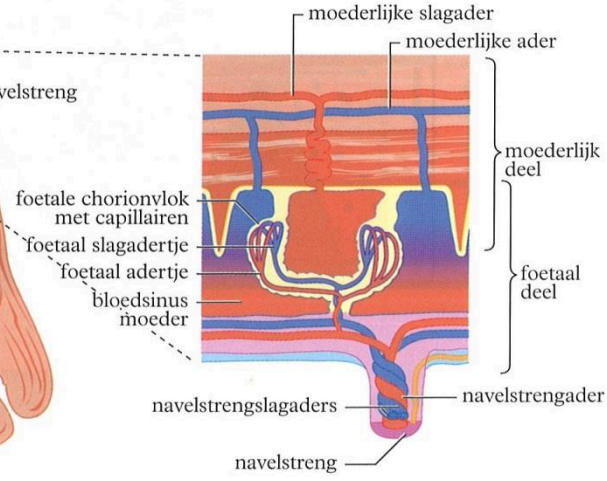
eind derde maand



drie-en-een halve maand

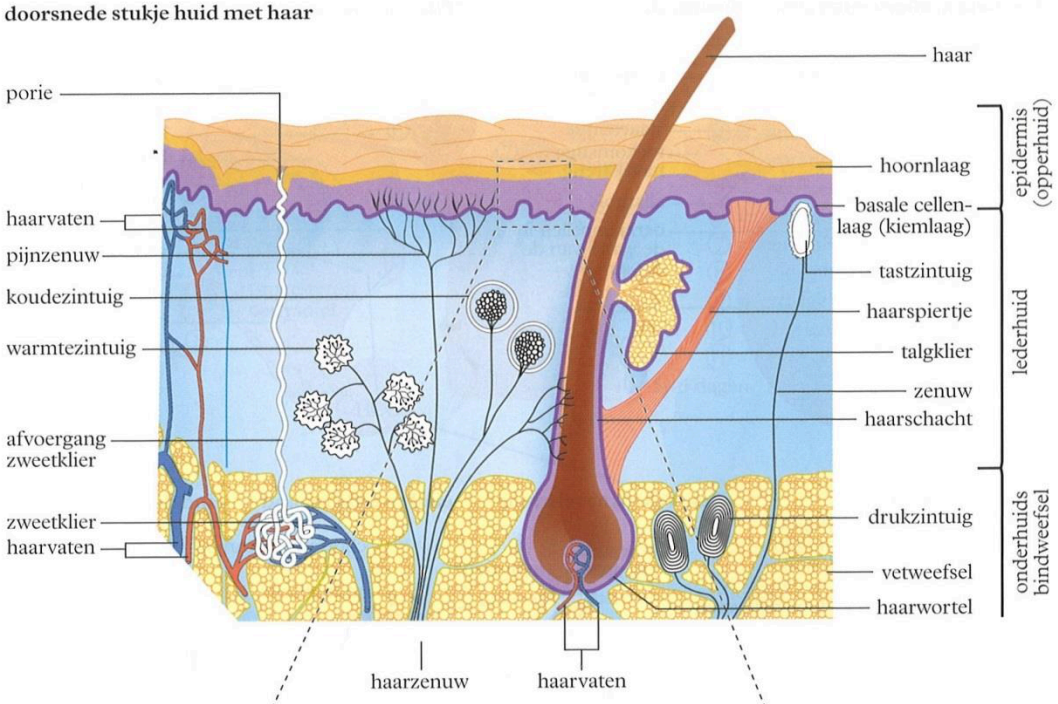


placenta, detail

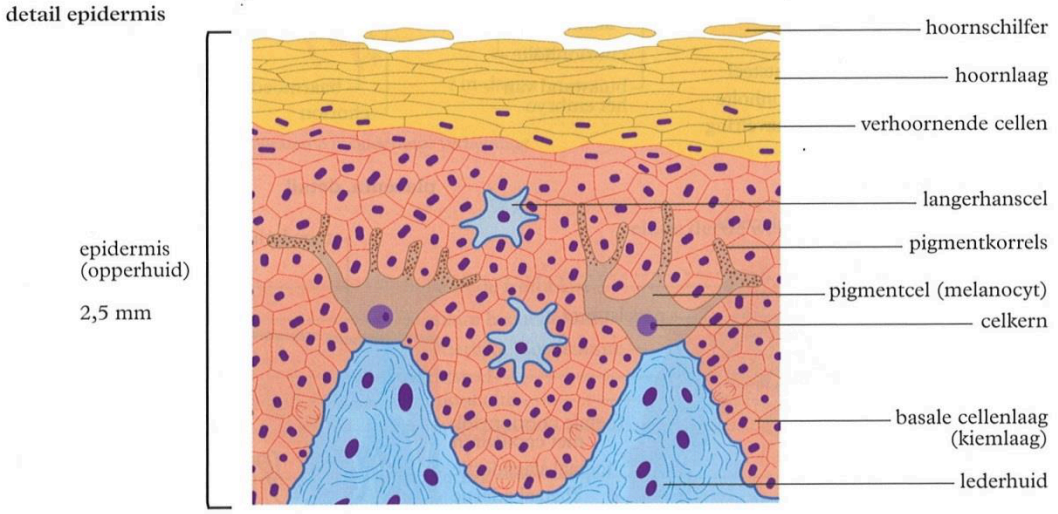


■ Foetale bloedsomloop: zie tabel 84B.

doorsnede stukje huid met haar

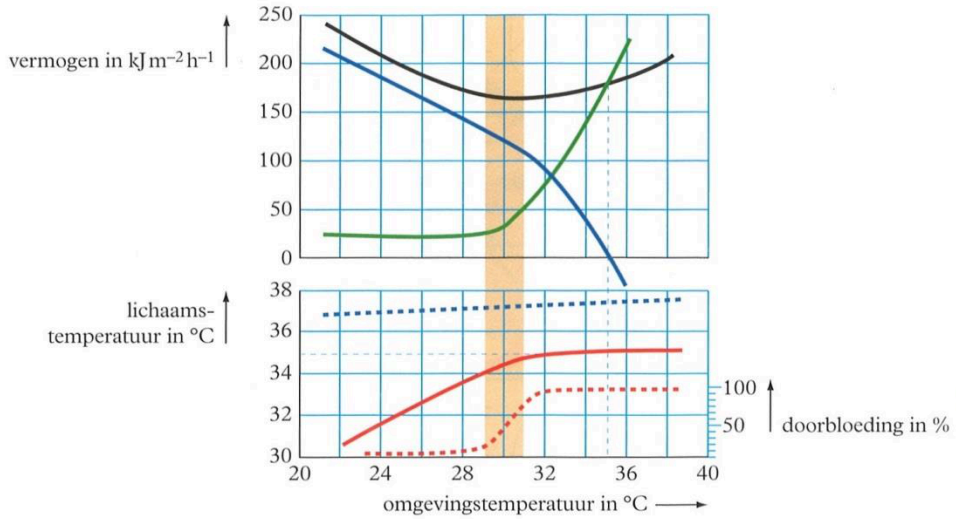


detail epidermis

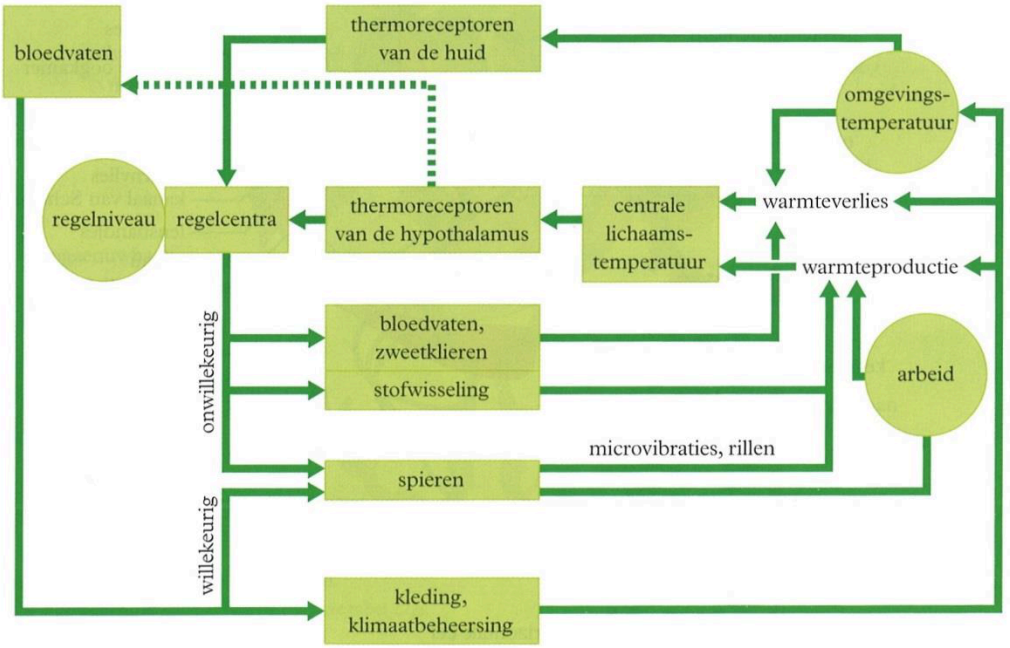


■ Zie ook tabel 27B.

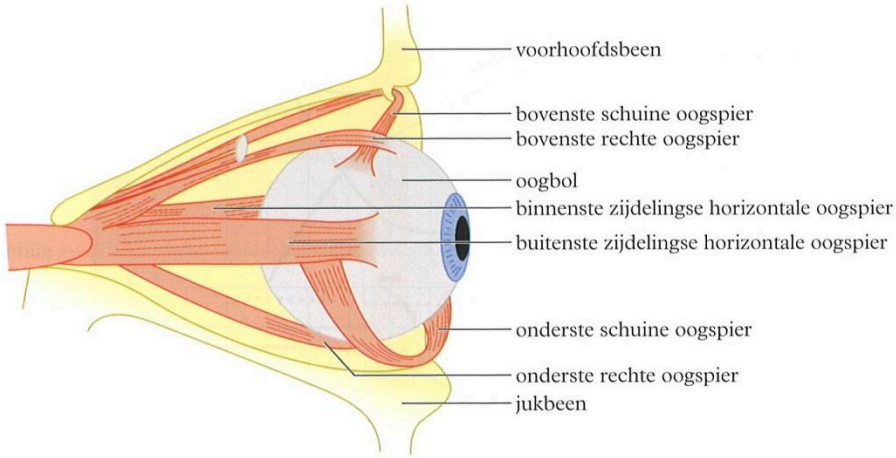
warmteregulatie bij een rustende niet-geklede mens



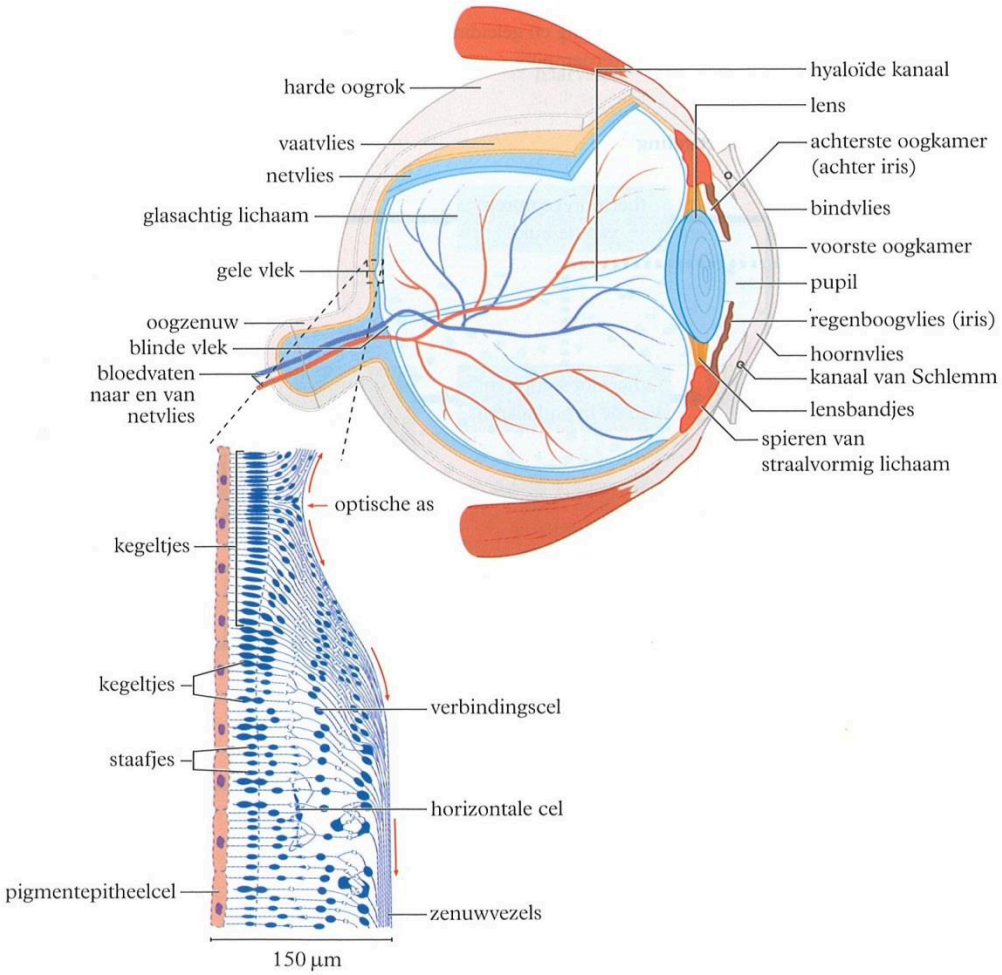
schema van de temperatuurregeling



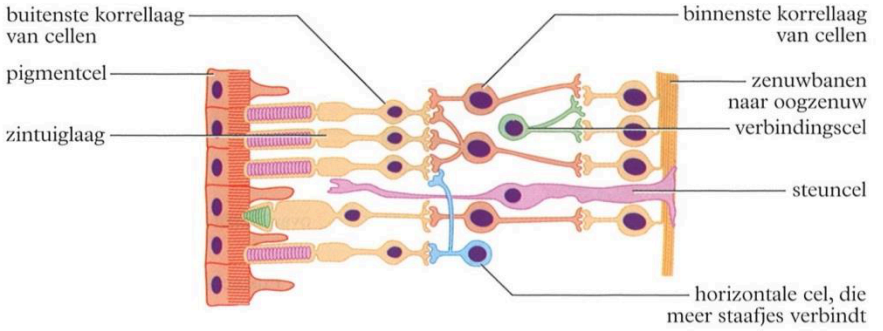
1 Oog met oogspieren



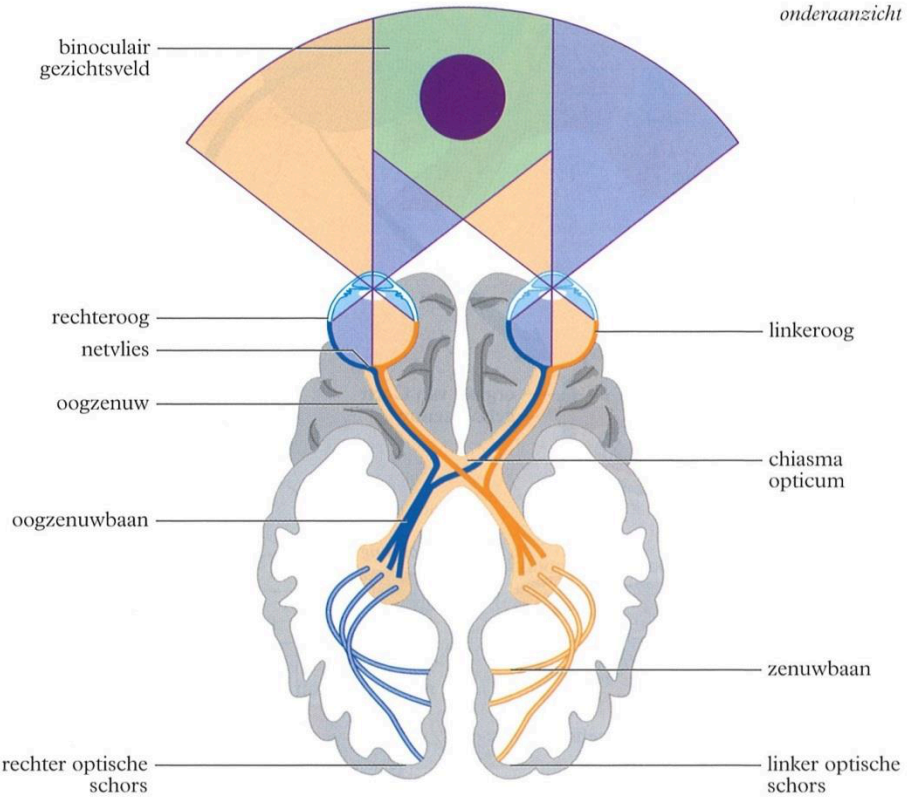
2 Horizontale doorsnede linker oog en structuur netvlies



Netvlies detail 3

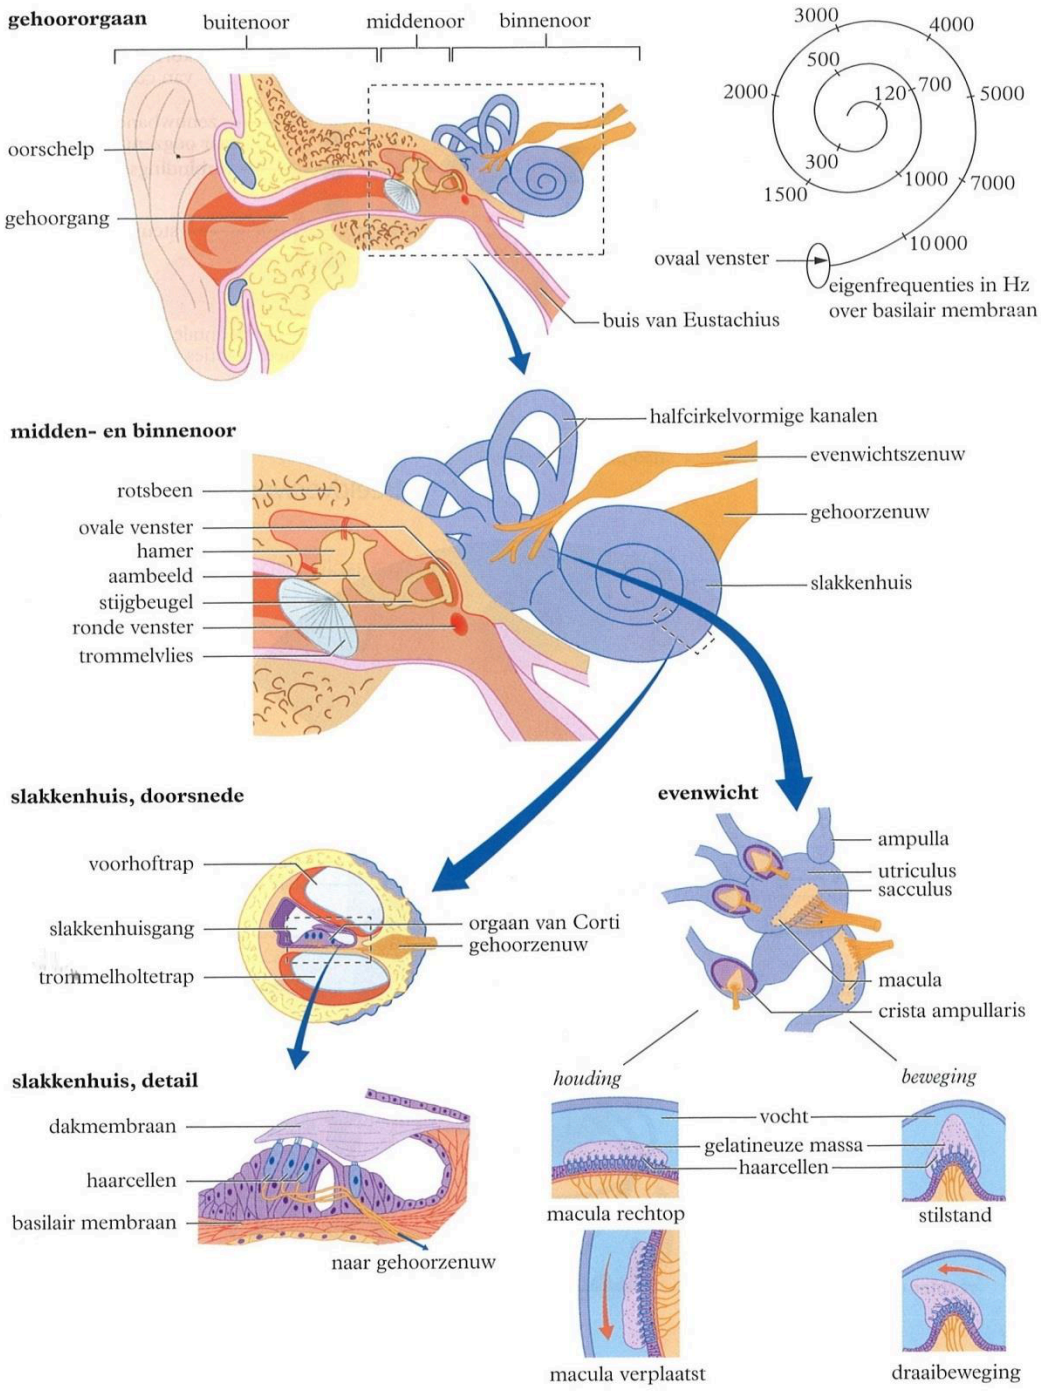


Beeldverwerking in de hersenen 4

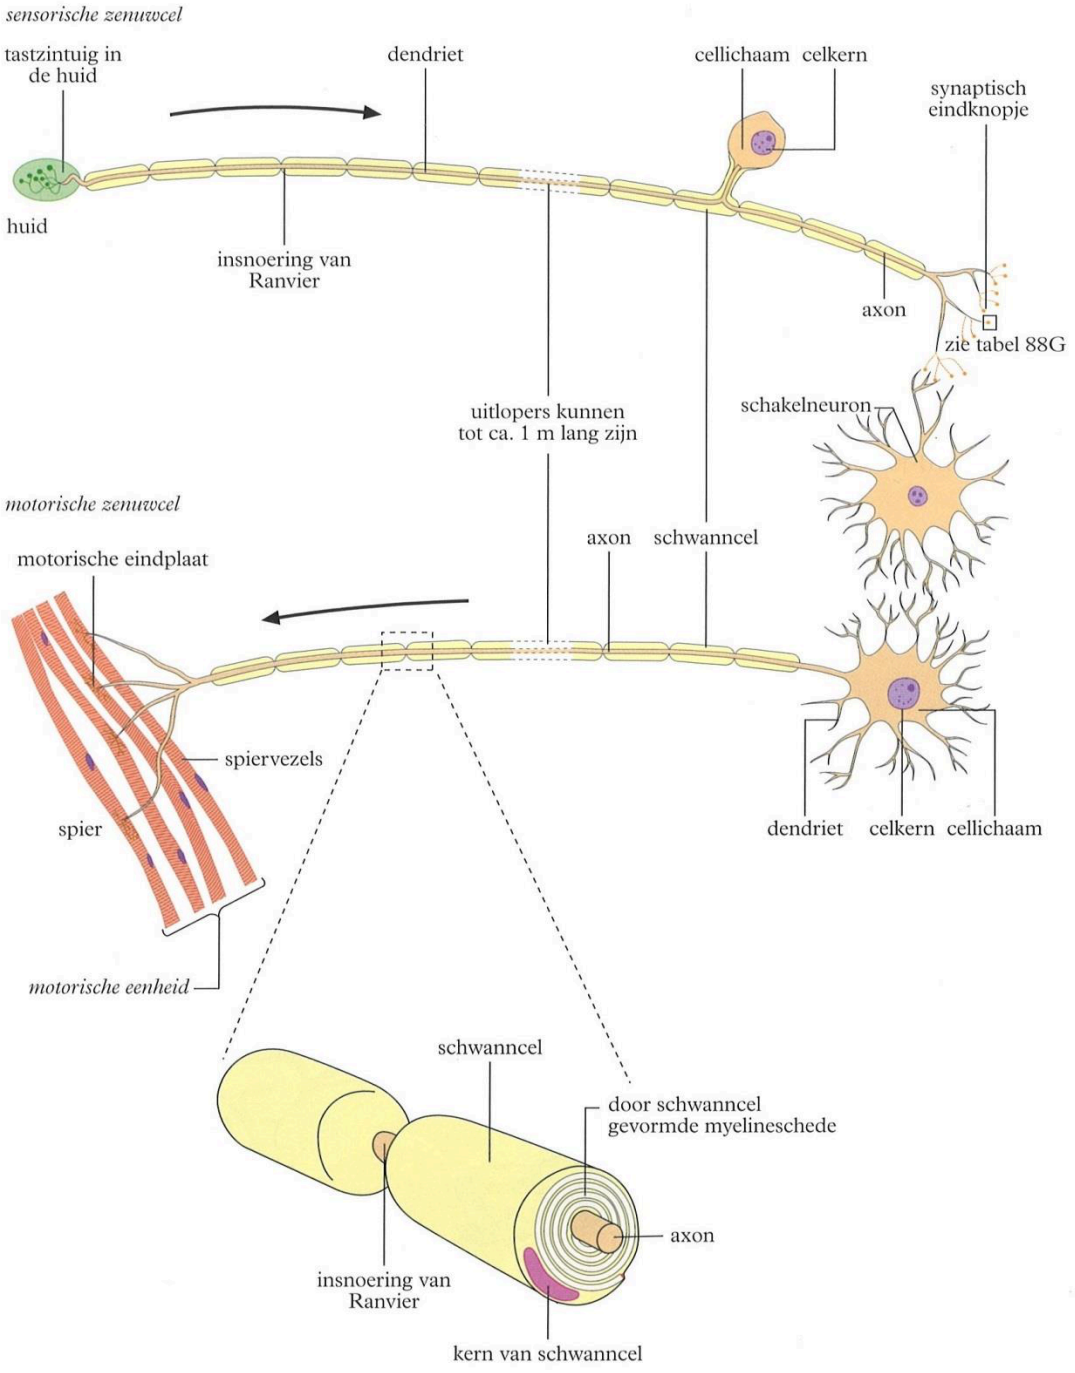


■ Brekingsindices in het oog (mens): zie tabel 18.

■ Fysische eigenschappen van het oog (mens): zie tabel 27A.



■ Akoestische schaal voor de mens: zie tabel 15D.
■ Oor (mens) en gehoorgevoeligheid: zie tabel 27C.



■ ⟶ Geeft richting actiepotentiaal aan.
